

Course Outline

Aspects International

Environmental Management Systems Internal Auditor Training

Introduction

This two day intensive course is designed to give internal audit personnel the necessary skills to effectively audit an environmental management system. The course leads delegates towards the philosophy of ISO 14001 focusing on the effectiveness of the EMS and environmental performance. The course follows the guidance in ISO 14001 and ISO19011 on the principles and practices of environmental management and environmental auditing.

Course Objectives

By the end of the two day course delegates will:

- Have an understanding of the requirements of the various Environmental standards.
- Have an appreciation and correctly interpret of the audit requirements of an EMS
- Understand audit procedures
- Know how to plan an audit and produce an audit report

Course Content

Day One

- Understanding ISO 14001
- Audit Strategy: auditing procedures, auditing clauses, auditing risks
- Auditing Process: planning, collecting the evidence, reporting
- Continual Improvement

Day Two

- Practical on-site audits
- Reporting

Who should attend?

Existing internal audit personnel members of the proposed audit team.

What will you learn?

By the end of the course you will understand the requirements and be able to audit an environmental management system.
